Section 5

In this Section, we are going to take a look at...

- Elixir AST
- Quote and unquote
- Defining macros

Quote and Unquote

In this Video, we are going to take a look at...

- Elixir abstract syntax tree
- Quoting expressions
- Unquote

Why Metaprogramming?

The Abstract Syntax Tree

```
say_to(:David, "Hello!")
```

The Abstract Syntax Tree

`say_to(:David, "Hello!")`

`{:say_to, [], [:David, "Hello"]}`

The Abstract Syntax Tree

say_to(:David, "Hello!")

{:say_to, [], [:David, "Hello"]}

The Abstract Syntax Tree

```
defmodule X do  
  def y(a, b) do  
    a + b  
  end  
end
```

Unquote

Evaluate expressions inside quoted expressions.

```
quote do: 1 + 2
```

```
{:+, [...], [1, 2]}
```

Unquote

Evaluate expressions inside quoted expressions.

```
